- At least two vaccinations administered *or*
- Serological evidence exists

Chickenpox

- Chickenpox infection confirmed in medical history *or*
- At least two vaccinations administered *or*
- Serological evidence exists

Whooping cough

- Last vaccination on _____ DD/MM/YY (must have been administered in the last 9 years) *or*
- Whooping cough infection confirmed by laboratory diagnosis on _____ DD/MM/YY (no more than 9 years old)

Coronavirus

- 1st vaccination on _____ DD/MM/YY Vaccine _____
- 2nd vaccination on _____ DD/MM/YY Vaccine _____
- 3rd vaccination on _____ DD/MM/YY Vaccine _____
- Positive PCR result on _____ DD/MM/YY

Hepatitis B

- Infectious hepatitis B not currently present (hepatitis B basic immunization + anti-HBs >100 U/l or HBsAg neg. within the last 3 months)

Hepatitis C

- Infectious hepatitis C not currently present (anti-HCV neg. within the last 3 months)

With my signature I confirm that the above statements are correct

Place / date / signature

legible stamp with name of doctor

P.S.:

Your attention is drawn to the fact that a possible consequence of incomplete details or a lack of immune protection is that you will not be able to take up an internship or only subject to conditions. Apart from that, further vaccinations may be advisable for your own protection. Please make sure that your vaccinations are up to date (Standing Committee on Vaccination at the Robert Koch Institute).
